SUMMARY

Italian-American Software Engineer with an edge in communication: a sales and customer-facing background that turns complex business problems into clear technical solutions for stakeholders and engineers alike. Specialized in AI and Data Science, with a track record shipping production applications and leading small agile teams.

PROFESSIONAL EXPERIENCE

Solution Engineer Intern Feb 2026 – Jul 2026
Viking Office Direct (RAJA Group), Venlo, NL

- Designed and delivered an automated product onboarding pipeline for the Pricing team, reducing processing time from up to 60 minutes to under 5 minutes and projecting €17,250 in annual savings.
- Implemented schema-driven validation that eliminated a 40% onboarding error rate, with an adapter-based architecture enabling live system integration without structural changes.

Software Engineer (Part-time) Apr 2025 – Apr 2026
Beech Applications B.V., Venlo, NL

- Owned full-cycle delivery of a custom e-commerce web solution, handling client communications, design, development, and deployment; leveraged AI tooling to accelerate development and iteration cycles.
- Migrated a Laravel static website to a WordPress theme, collaborating with non-technical stakeholders.

Software Engineer Intern Sept 2024 – Mar 2025
Beech Applications B.V., Venlo, NL

- Built the foundation of a production e-commerce platform, optimizing bundle size and page load speed to deliver a fast and responsive user experience.

Data Scientist and Analyst Intern Jan 2024 – Jul 2024
Canon Production Printing Netherlands B.V., Venlo, NL

- Engineered and trained predictive AI models in a Scrum team of 3 to support business forecasting and reduce lead times between external suppliers and internal warehouse operations.

TECHNICAL PROJECTS

AI Anomaly Detection Device Sept 2025 – Jan 2026
University Project - Robert GmbH (Exact Colours), Emsdetten, DE

- Led a team of 5 to build a physical AI device on a Jetson Nano for real-time print anomaly detection; implemented a CNN model deployed fully on-premises and oversaw UI design and end-to-end project execution.

LinguaDaily Mobile Application Mar 2025
Available on Google Play Store

- Built and shipped a native Android app for daily vocabulary learning across languages, with real-time word updates via a self-hosted backend; leveraged AI tooling throughout development.

EDUCATION

Fontys Venlo University of Applied Sciences Sept 2022 – Jul 2026
Bachelor's degree, Software Engineering
Specializing in Data Science and Artificial Intelligence

ITT G. Chilesotti, Thiene, Italy Sept 2016 – Jul 2021
Technical Technological Institute
Specializing in Electronics and Robotics

SKILLS

Technologies: Python, JavaScript, TypeScript, Java, C++, Kotlin, SQL, PHP, React.js, React Native, Vue.js, Node.js, Laravel, FastAPI, Pandas, Scikit-learn, Docker, Git, PostgreSQL
